INNOVATIVE SOLUTIONS FOR POSITIVE PATIENT IDENTIFICATION

Because the process of patient identification remains largely manual and persists across the entire patient journey, it can be prone to errors and lead to serious patient harm. Automated patient identification systems are essential to correcting this long-standing problem and improving the health and well-being of patients.

HOW DOES THE NHS ENSURE PATIENT SAFETY IN ITS SCAN4SAFETY PROGRAMME?

Scan4Safety is a barcode identification program that enables staff to track each patient through their hospital journey from admission to discharge. The resulting actionable insights enable hospitals to significantly enhance the quality of patient care, reduce unnecessary waste, and improve medical stock management. Learn how the NHS can better ensure patients receive the right treatment, reducing errors and delays with the use of barcodes.
